Section 3 – Comparison Table

Criteria	LLM #1 Gemini	LLM #2 ChatGPT
Structure	The resume has a standard structure with the name and contact info at the top, a summary, then distinct, well-organized sections for Education, Experience, Skills, and Core Competencies.	The resume also has a standard structure, with clear sections for Contact, Objective, Education, Skills, Core Competencies, Experience, Academic Highlights, and References.
Clarity	The content is direct, and the use of headings and bullet points makes it very easy to read and understand the qualifications.	This resume is also very clear, using formatting effectively to create an easily digestible document. The 'Academic Highlights' section is a nice touch for a student.
Formatting	This version has superior formatting. The use of a professional blue accent color for the name and horizontal lines provides a polished, modern look. Dates and locations are clearly aligned, making good use of white space.	The formatting is solid and professional, using bolding and clear headings. However, the alignment for dates is less precise than in LLM #1, and it is entirely monochromatic.
Overall Quality	This is a very strong, professionally designed resume. The modern aesthetic from the minimal color use and clean line separation gives it a polished edge.	This is a high-quality, straightforward resume that clearly communicates the candidate's skills and experience. It is a very effective and professional option.

Section 4 – Reflection (200–300 words)

Guide questions:

- Which LLM performed better and why?

LLM #1 (Gemini) performed better overall. While both models captured your background accurately, LLM #1 produced a document that looks significantly more "executive." It balanced white space effectively, used a more sophisticated layout (right-aligned dates and locations), and incorporated subtle design elements like the blue header and horizontal dividers. These features make the resume look like a finished product ready for a job application, whereas LLM #2 felt more like a well-organized draft.

- What differences did you observe?

Layout: LLM #1 used a clean, organized design with right-aligned dates. LLM #2 used a basic, top-down list format.

Tone: LLM #1 focused on professional achievements ("Streamlined," "Facilitated"), while LLM #2 focused on basic duties ("Managed," "Assisted").

Visuals: LLM #1 used subtle color and lines to separate sections, making it easier to scan quickly.

- What improvements did you make in your final resume?

Better Verbs: Replaced generic tasks with high-impact action words.

Organization: Grouped skills into clear categories (e.g., Financial Literacy, Digital Marketing) for better readability.

Focus: Emphasized your HR and Management majors to match your career goals.

Clarity: Removed fluff to ensure the most important information stands out to recruiters.

- What did you learn about prompting?

Specificity: Giving the AI exact details about your degree and internship leads to much better content.

Style Prompts: Asking for a specific "look" (like modern or minimalist) changes the output quality significantly.

Comparison: Testing different models helps identify which writing style and format works best for your specific industry.

Section 5 – Final Resume

- Your improved, polished one-page resume
